School Performance note

From 2024, the school performance report reflects a revised performance model that focuses on student learning and wellbeing outcomes.

School Performance Groups have been simplified and allocate schools to one of four different performance categories, High, Improving, Medium and Developing.

HIGH	In the HIGH performance group, student outcomes are high across a range of learning and wellbeing measures
IMPROVING	In the IMPROVING performance group, student outcomes are mixed, with notable improvements across a range of learning and wellbeing measures
MEDIUM	In the MEDIUM performance group, student outcomes are mixed, with measures of learning and wellbeing generally stable or declining
DEVELOPING	In the DEVELOPING performance group, student outcomes are generally low across measures of learning and wellbeing

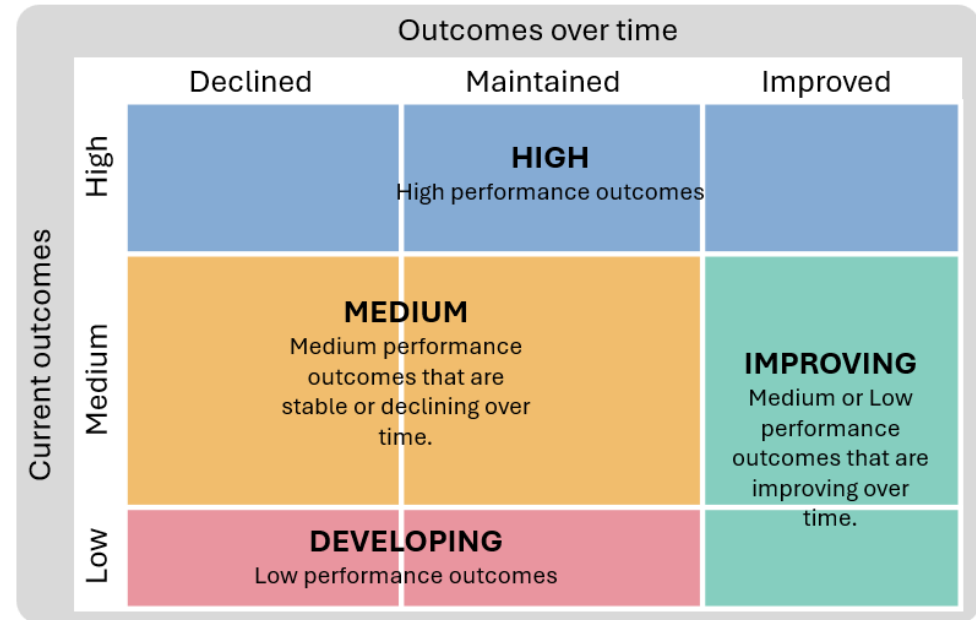

School Performance Groups

School Performance Groups have been updated in 2024.

Performance groups are assigned to schools at different levels: measures, domains and overall.

A school's overall, learning domain and wellbeing domain performance is determined using current student outcomes and the level of change over time, for each applicable measure.

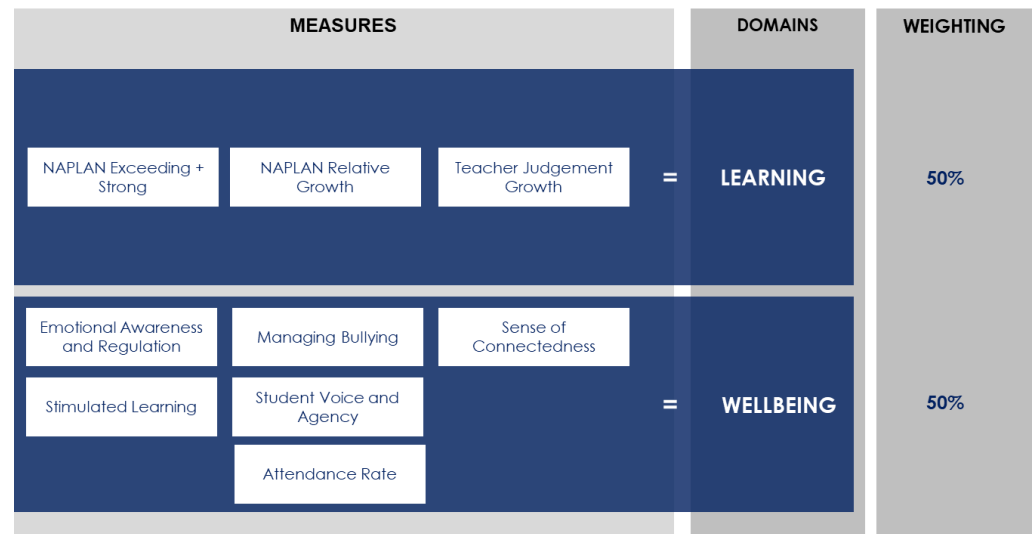

The four performance groups are identified using the matrix shown on the right.

School Performance Method

School performance in the two domains, learning and wellbeing, is an aggregation of the results for the school in each measure.

These measures have been selected based on FISO 2.0, and link to school improvement. The chosen measures for each domain are shown in the illustration on the right.

Similar schools groups

Similar schools groups have been developed for Panorama school dashboards and reports. Similar school groups enable fair and meaningful comparisons between schools with similar characteristics.

The characteristics that are considered in creating similar school groups are Student Family Occupation and Education (SFOE) index, school size, cultural diversity and remoteness.

Your school's measure outcomes are compared to those in your similar schools group, in terms of 'Well below', 'Below', 'Similar to', 'Above' or 'Well above'.

Similar schools comparison

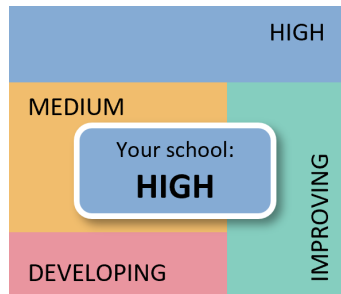

The method for determining your school's comparison relative to similar schools is based on the ranked results of the similar schools group, divided into quintiles. This is illustrated in the chart below. For the school in the example, their result is seventh from the bottom, falling into the second bottom quintile. Relative to similar schools, this school's results are 'below' that of secondary schools with similar characteristics.

Bruthen Primary School

LEARNING performance group

Current Level: High
Change Level: Improved

The Learning domain measures performance on NAPLAN assessments in Reading and Numeracy, NAPLAN relative growth, and Teacher judgement growth for English and Mathematics.

Schools in this similar schools group have achieved a range of performance categories, including 9 schools in the High category.

Similar schools' LEARNING performance groups

WELLBEING performance group

Current Level: High
Change Level: Improved

The Wellbeing domain measures performance on a set of Attitudes to School Survey factors related to emotional awareness, managing bullying, school connectedness, stimulated learning and student voice; and the school's attendance rate.

Schools in this similar schools group have achieved a range of performance categories, including 15 schools in the High category.

Similar schools' WELLBEING performance groups

OVERALL performance group

Your school:
HIGH

A school's overall performance group represents its combined performance on Learning and Wellbeing Domains.

As an overall performance group, this indicates a range of student outcomes that are high across learning and wellbeing measures.

SIMILAR schools

Comparing your school's performance with the performance of your similar schools group can provide information about how your school performs compared to schools with similar characteristics.
